

PRITAM PRIYABRATA PALAI

9337492146 | palaipritam62@gmail.com | LinkedIn | GitHub | LeetCode | Bengaluru

SUMMARY

Information Science undergraduate (2027) with practical experience building backend systems and web applications using Java, Go, Python, Spring Boot, Django, and SQL. Strong understanding of Data Structures, Object-Oriented Programming, DBMS, and Computer Networks, applied across internship and academic projects. Comfortable owning backend APIs and microservices end-to-end, from design to deployment, in agile team environments.

EDUCATION

Dayananda Sagar Academy of Technology and Management
B.E. in Information Science and Engineering **CGPA: 9.01 / 10.0**

Sept 2023 – Jul 2027

TECHNICAL SKILLS

- **Languages:** Java, Go (Golang), Python, SQL, TypeScript, C
- **Backend & APIs:** Spring Boot, FastAPI, Django, Node.js, Express.js, RESTful APIs, Microservices
- **Databases:** PostgreSQL, MySQL, MongoDB, Firebase
- **Frontend:** React, Next.js, HTML, JavaScript, Tailwind CSS
- **DevOps & Tools:** Docker, Git, GitHub, Linux, Postman, Vercel, Render, Figma
- **AI & ML:** LangChain, LangGraph, LLMs, RAG Architectures, Hugging Face, Scikit-learn
- **CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Design, Distributed Systems, Network Fundamentals

EXPERIENCE

Software Development Intern

10 Jul 2025 – 10 Aug 2025

Shree Jagannath Techno Solutions Pvt. Ltd. (SJTSPL)

Bengaluru

- Built and owned **backend REST APIs** in the logistics domain using **Java** and **Spring Boot**, applying **object-oriented design** patterns throughout the service layer; designed the Trip Detail UI with Vaadin to surface structured logistics data.
- Improved UI-to-backend communication across distributed application layers, reducing manual data-handling steps; gained practical exposure to **enterprise backend architecture**, deployment pipelines, and backend security considerations in a production environment.

ACADEMIC PROJECTS

IntentScope – Intelligent LLM API Gateway

Go · FastAPI · PostgreSQL · Docker · Next.js · LiteLLM

GitHub | Live Demo

- Owned end-to-end design of a **distributed microservices** LLM API gateway in **Go** and **FastAPI** with dynamic model routing driven by real-time intent analysis; used **PostgreSQL** for persistent state and cost-optimized provider selection across a unified interface.
- Engineered a **scalable, fault-tolerant** request orchestration layer containerized in **Docker**; implemented automatic retry logic and concurrent provider failover handling, ensuring high availability under load — applying common **backend design patterns** including circuit-breaker and gateway aggregation.

OfferVault – ML-based Placement Coach

Python · React · Scikit-learn · Hugging Face · MongoDB · Next.js

GitHub

- Built a **Python** ML pipeline for resume analysis using NLP, feature extraction, and cosine-similarity scoring; implemented a recommendation engine and interview evaluation system using LLMs and structured candidate profiles.
- Designed **object-oriented** data models and a modular processing architecture; applied **algorithm design** for multi-dimensional candidate ranking across structured and unstructured data with measurable scoring output.

CERTIFICATIONS & ACHIEVEMENTS

- **SAP Certified Associate – Generative AI Developer** SAP
- **Database and SQL for Data Science with Python** Coursera (IBM)
- **Hadoop Developer in Real World** Udemy
- Participated in multiple hackathons and coding competitions, collaborating in teams to solve complex problem statements.
- Core Member, College Drama Team – **1st Place**, Inter-College Street Play Competition.
